1. The amendment filed 11/20/2006 has been entered and considered by the examiner.
2. Claims 67-78, 81-83, 87, and 89-91 are presenting for examination.
3. The previous examiner failed to raise the issue of restriction and the current examiner takes this opportunity to address that issue.

### *3. Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 67-78, 81-83, and 89-91, drawn to Cooperative computer processing, classified in class 709, subclass 205.
- II. Claim 87, drawn to Distributed data processing, classified in class 709, subclass 201.

The inventions are distinct, each from the other because of the following reasons:

- A. Inventions I & II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP, 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP, 806.04(h)). Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2157

B Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

C. Because these inventions are distinct for the reasons given above and the search required for each Group is different, restriction for examination purposes as indicated is proper.

D. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Moustafa M Meky whose telephone number is 571-272-4005.
